There is a cover between the engine and the trans that u remove, then u can gain access to them. Then you remove all the transmission bellhousing bolts , and they will separate. the harder part is getting them back together, your gonna need to support the tranny and lift it a little with a floor jack. best to take out the radiator so when your using a cherry picker you dont ram into it. hope this helps.

Pull the kick panell on the passenger side, youwill see a shiny little box, the ECU. Unbolt the ecu from the body, and pull the connectors out. There are a couple more connectors that are right there that will also have to be disconnected (engine harness to cab harness). As soon as you do that, you can pull the harness right through the firewall.
