A Course Of Modern Analysis
A Course of Modern Analysis: an introduction to the general theory of infinite processes and of analytic functions; with an account of the principal transcendental functions (colloquially known as Whittaker and Watson) is a landmark textbook on mathematical analysis written by E. T. Whittaker and G. N. Watson, first published by Cambridge University Press in 1902. The first edition was Whittaker's alone, but later editions were co-authored with Watson.

Alf van der Poorten accurately summarized this book in his Notes on Fermat's Last Theorem by writing, "Notwithstanding its title, 'Whittaker and Watson' is neither 'modern' nor 'analysis,' as we now understand it. But it is the bible of the classical special functions." The last edition of this bible was in 1927, and it is still in print from Cambridge.
