Jet Improved Formula Detergent Powder - MAMARSHOP

Well, actually there is no specific formula for detergent. Detergents usually made out of surfactants. Basicly, if we assume the molecule as a chain, one end of the chain prefers to stay in the water (hydrophilic) while the other end prefers to stay out of the water (hydrophobic). I think the simplest example is sodium stearate:

What is the chemical formula of detergent? - Quora

Mechanism: A) Surfactant converts greasy and oily dirt into micelle that become dispersed in water. Solubilisation of oil, achieved by micellar action When the detergent dissolves in water, detergent molecules group themselves around an oil droplet (a). The water-repelling part of the molecules (light area) projects into the droplet, while the water-soluble part (dark area) remains in the ...
