Z 5 is powered by Nikon's fast, comprehensive Expeed 6 image processing system. It's the secret behind the camera's sensational photo and video quality, autofocus performance, low-light capabilities, distortion control, image clarity, color reproduction and more.

Nikon Z5 | Entry-Level Full Frame Mirrorless Camera

Coming to you from Jared Polin, this great video takes a look at the latest eye autofocus capabilities in the Canon EOS R5, Sony a7R IV, and Nikon Z 7. Up until last year, Sony was pretty much the ...

Which Brand Has the Best Eye Autofocus: Canon, Sony, or Nikon?

In the "applications" phase, Nikon applies for strategic patents for comprehensive inventions. In the "patent portfolio building" phase, the company builds up a wide-ranging portfolio of patents to establish a competitive advantage, taking into account trends in customer needs and trends in the developments of its competitors.

Nikon | Technology & Design | Intellectual Property ...

Instead of Canon 1D X III or Nikon D6 I had an eye on the Leica SL2. It was announced after the two others, but is already available since December. It is robust (made of metal) and has a IP54 sealing. And it is both high resolving and fast - it offers 47 Mp at up to 20 fps with e-shutter, and 10 fps with mechanical shutter.

First look at the Nikon D6: Digital Photography Review

Each year, Nikon holds the Nikon Small World Photomicrography Competition to recognize the coolest images of the smallest subjects. The 2020 winners were just announced, and as usual, it's a ...

Nikon offers a full line of eye glass lenses, from your fully personalized dual surface digital lens design, your every day progressive lenses, as well as a dual aspheric single vision lens with crisp, clear optics across the entire surface of the lens.

Nikon Eye Glasses Lens Designs | Nikon Lenswear

The Z 6II and Z 7II are the first Nikon cameras to support Eye-Detection AF and Animal-Detection AF with video recording, enabling continuous focus on the eyes of humans, dogs, and cats.

The Next Chapter of Z Is Here: Nikon Delivers More of ...

Nikon Z6 and Z7 firmware version 2.0's Eye-Detection AF feature automatically detects and focuses on human eyes in the cameras' auto-area AF mode (AF-S, AF-C) and focuses on them. In a group setting, the Eye-Detection AF mode will lock on one person's eye, and then you can use the multi-selector to switch between eyes and people.

Which Nikon cameras have Eye-Detection AF? | Camera Jabber

Nikon is one of the world's leading suppliers of products and solutions based on advanced opto-electronics and precision technologies. More than meets the eye. Nikon is famous for its cameras and binoculars, but we make a whole range of other products too.
