Window air conditioners or central air aren't the only way to cool down a hot house. Check out these alternative solutions for making your house more comfortable. A whole-house fan uses one-tenth as much power as AC. It draws cooler outside air in through open doors and windows to create a pleasant ...

How to Remove Hot Air from a Room: Home Air Cooling Tips ...

The warm, buoyant air is at a higher pressure than the cold air outside, and will want to move up and out, through windows, ventilation openings, and leaks in the walls, ceiling, and roof. Downstairs and in the basement, low-pressure cool air rushes in to replace the rising air in an attempt to maintain pressure balance.

Ventilation and Air Distribution | Smarter House

If this is the case, the warm moist air from your living space is being drawn into the attic to try to equalize that pressure. Also, the vent should remain open. It's near impossible to actually stop the natural flow of warm moist air entering your attic from the living space so the vent helps to flush that out.

Home - Air Solution Company (Cottonwood Filter Screens)

Use jump ducts to allow air flow in and out of the room. Jump ducts are u-shaped tunnels that create the same effect as leaving the door open, as they allow air to flow back out of the room when it comes in through the AC vent. For best results, install jump ducts in the attic. To install: Cut holes in the ceiling drywall.

3 Ways to Create Airflow in a Room - wikiHow

The HEG Air™ Circulation System (ACS) is a hybrid system that has been created over 5 years by Home Efficiency Group by a process of continual refinements. At its heart, the HEG ACS is an overgrown air transfer system, albeit with significant differences, including:

Ducted Air Circulation | HEG : Home Efficiency Group

If the air flow is blocked the temperature inside a furnace will rise until a High Limit Switch shuts it off. Most everyone knows that the filter needs to be replaced every 1-3 months depending on how much dust and other debris is in the air. The right furnace filter can improve the air quality of a home and reduce allergies.
