Scientific Revolution - Scientific Revolution - Physics: The battle for Copernicanism was fought in the realm of mechanics as well as astronomy. The Ptolemaic-Aristotelian system stood or fell as a monolith, and it rested on the idea of Earth's fixity at the centre of the cosmos. Removing Earth from the centre destroyed the doctrine of natural motion and place, and circular motion of Earth ...

Galileo Galilei (1564–1642) has always played a key role in any history of science and, in many histories of philosophy, he is a, if not the, central figure of the scientific revolution of the 17th Century. His work in physics or natural philosophy, astronomy, and the methodology of science still evoke debate after over 400 years.

Throughout the Stamp Act crisis of the 1760s — the “Prologue to Revolution,” according to the title of historian Edmund S. Morgan’s published collection of documents — the British North American colonists sent petition after petition to both houses of the British Parliament. These petitions frequently asserted the rights that the colonists possessed as British subjects.
