The B31 piping codes are primarily construction codes for new facilities. They can be used successfully in replacing or extending a piping facility. With few exceptions, notably the pipeline sections, there are no maintenance and ongoing requirements. The pipeline sections have relatively extensive detailed requirements for continuous maintenance.

The discussion now moves to those sorts of calculations that occur in piping systems where pipe of different materials has to be welded directly together. When that happens, a differential expansion of the two sections of pipe causes a strain difference. There are two handy ways to make decisions on existing pipe or pipelines.
