(see engine owner's manual for oil type and amount) Remove the sides of the crate for easy access to engine. We recommend you use an engine hoist to lift engine from crate; attach the hoist to the two lift eyes on top of engine. Locate and mark the center of your backboard and place motor in center.

Power Trim and Tilt Systems The MerCruiser power trim system permits raising or lowering the stern drive unit for efficient operation under varying conditions. Early stern drive units used a mechanical tilt system in the form of a series of holes in the gimbal ring. After the unit was set at the desired angle, an adjustment

by Guy Gaspar Initial Testing Before you tear anything apart or replace wiring and switches, test it out; first by visual inspection by pulling back and forth on the wires while operating the switches and then test with a meter. At the commander switches, the red wire will always have 12 volts. The green wire gets 12 volts when the trim toggle is held down. The blue wire gets 12 volts only ...
