The 1980s saw a start in the development of the synchronous digital hierarchy (SDH), with the intention of eliminating the disadvantages inherent in PDH. SDH brings the following advantages to network pro-viders: 1. High transmission rates Transmission rates of up to 10 Gbit/s can be achieved in modern SDH systems.

Synchronous optical networking (SONET) and synchronous digital hierarchy (SDH) are standardized protocols that transfer multiple digital bit streams synchronously over optical fiber using lasers or highly coherent light from light-emitting diodes (LEDs). At low transmission rates data can also be transferred via an electrical interface. The method was developed to replace the plesiochronous ...
