command.. For example, to get the documentation for IO::File, enter perldoc IO::File from your command prompt. Module documentation is also available on metacpan.org

### **Docs - [www.perl.org](http://www.perl.org)**

Strawberry Perl is a community-driven Open Source project, which means that most of the people directly involved have jobs, families and/or other commitments beyond just Strawberry. To maintain sustainable long-term production of the distribution, we like to keep everything as simple and community driven as possible, so that our smartest users can help each other and all official features "Just Work".

### **Strawberry Perl for Windows - Support**

Strawberry Perl Documentation Perl is a programming language suitable for writing simple scripts as well as complex applications — see <https://www.perl.org>. Strawberry Perl is a perl
