The emotional context changes our physical experience of touch. As we all know well, touch can actually feel physically different based on the social context of the encounter. Consider the example of an arm around the shoulder, said Linden: Whether it's coming from a good friend, your lover, your boss or a person you don't like very much will change the way you experience that touch, even if ...

Horses' tactile sensation, or touch, is extremely acute. Their entire body is as sensitive as our fingertips. They can feel a fly on a single hair.

Horse Senses - Horses

I let my friend touch my wife. Last night we had a bunch of people over and ended up with some of us in the hot tub, By the end of the night my wife was passed out in a lounge chair on the deck and just me and my best friend were left sitting in the hot tub, everyone else was gone home, We were pretty drunk and I know he has always thought my wife was hot, He looked over at her and said "Geez ...

I let my friend touch my wife - confessionpost.com

The sense of touch is one of the most developed and important for the horse in terms of human interaction. The nose, lips, mouth, and possibly the ears are the most sensitive areas to touch. Although hooves do not respond to touching, various parts of the hoof are able to feel touch.
