Wired for Speech: How
Voice Activates and

Advances the Human-Computer Relationship. How interactive voice-based technology can tap into the automatic and powerful responses all speech--whether from human or machine--evokes. Interfaces that talk and listen are populating computers, cars, call centers, and even home appliances and toys, but voice interfaces invariably

frustrate rather than
help.

Wired for Speech:
How Voice Activates

and Advances the ...
Wired for Speech demonstrates that people are "voice-activated": we respond to voice technologies as we respond to actual people and behave as we would in any social situation. By leveraging this powerful finding, voice interfaces can truly emerge as the next frontier for efficient, user-friendly technology.
